Service Overview

HP Anyware Quick Start enables you to purchase Professional Services as you need them. A Quick Start package includes 8 hours of expert support for deploying HP Anyware products. Customers can use this service for anything from receiving guidance and assistance with the initial installation of HP Anyware products with a single package, to sophisticated deployment scenarios with a pay-as-you-go approach.

As the name states, Quick Starts are intended to be fast – within a few days (typically four 2-hour sessions), you can get your HP Anyware installed and tuned.

For more involved scenarios, multiple Quick Start packages can be purchased as needed, allowing for a flexible, const-sensitive approach to large projects.

Our expert team will guide you with a multi-point checklist, leveraged from best practices and based on years of delivering successful HP Anyware deployments to customers like you.
