Teradici Cloud Access Software provides high-performance remote visualization capabilities in AWS EC2 G2, G3, G4 and Elastic GPU instances to deliver a great user experience for the most graphics-intensive applications and workloads. Cloud Access Software is built on industry-leading PCoIP® technology, to securely deliver a rich user experience across all network conditions on a variety of desktop and mobile endpoint devices, including ultra-secure PCoIP Zero Clients. Teradici PCoIP® technology compresses and encrypts the entire computing experience securely in the cloud and transmits only pixels to the endpoints – ensuring intellectual property and sensitive data never leave the cloud.

**HOW IT WORKS:**

- Teradici Cloud Access Software is installed on your virtual machine in AWS. It only sends encrypted pixels to the endpoint, leaving all data secure in the cloud.
- The pixels are decoded by the Teradici Zero Client, soft client or mobile client on the endpoint and displayed for the user. [teradici.com/product-finder/client-downloads](teradici.com/product-finder/client-downloads)
- Teradici license key is required: contact sales@teradici.com or schedule a consultation at [teradici.com/4AWS](teradici.com/4AWS)
- Cloud Access Software is now available on the AWS Marketplace for both Linux CentOS and Windows. Billing is simplified and bundled with cloud consumption into one payment. Find out more at [aws.amazon.com/marketplace](aws.amazon.com/marketplace).

**INDUSTRIES:**

- **Media & Entertainment**
  Creatives need remote access with lossless distortion-free support, color accuracy and high frame rates.
- **Manufacturing (Automotive)**
  Remote 3D CAD collaboration, view CAE jobs without downloading large data sets.
- **Architectural, Engineering, and Construction**
  Great remote user experience for 2D and 3D CAD design, drafting, modeling, architectural drawing and engineering.
- **Oil and Gas / Geospatial**
  Securely access and interact with cloud-hosted data sets across remote teams.

KEY BENEFITS:

- Rich End User Experience with leading PCoIP Technology: Workstation users receive outstanding remote experience, with highly responsive screens, under any network conditions.
- Increases User Productivity: High flexibility and enables connection from any compatible end points from work, at home or on-the-go.
- Enhanced Security: Transmitting pixels only, no data, protecting corporate IP. Compatible with ultra-secure, easy to manage PCoIP Zero Clients.
- Flexible deployment options to meet business needs: Available for easy billing on AWS Marketplace or can be installed directly on AWS EC2 G2, G3 or G4 instances. Bring your own license to AWS – purchase through Teradici resellers.

SYSTEM REQUIREMENTS/SPECIFICATIONS:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Virtual Machine</td>
<td>AWS EC2 G2, G3, G4 and Elastic GPU instances</td>
</tr>
<tr>
<td>GPU support</td>
<td>NVIDIA (refer to our product documentation for versions and GPUs)</td>
</tr>
<tr>
<td>Supported Guest OS</td>
<td>Windows 10 64-bit, Windows Server 2016, Ubuntu LTS 16.04 and 18.04, RHEL 7, CentOS 7</td>
</tr>
<tr>
<td>Compatible clients</td>
<td>• PCoIP Zero Clients</td>
</tr>
<tr>
<td></td>
<td>• PCoIP Software Clients for Mac, Windows, Chrome OS</td>
</tr>
<tr>
<td></td>
<td>• PCoIP Mobile Clients for iOS, Android</td>
</tr>
<tr>
<td>Max display resolution</td>
<td>Up to 4 monitors at up to 4K UHD resolution</td>
</tr>
</tbody>
</table>
