

# Teradici Thin Client Access

Connect PCoIP-Enabled Thin Clients to Teradici CAS and Amazon WorkSpaces Deployments

**PCoIP® technology** is trusted by performance-demanding users to deliver a secure, full fidelity and outstanding user experience over the most challenging network conditions. It provides end users with access to on-premises or cloud-based remote desktops and compresses, encrypts and transmits only pixels to the user's device, keeping data and content secure.

**The Teradici Thin Client Access (TCA) subscription** provides users with PCoIP-Enabled Thin Clients access to their Teradici CAS and Amazon WorkSpaces deployments. Purchase a TCA subscription for your thin client to securely access remote desktops and workstations via a PCoIP connection.

Please note: Teradici CAS and Amazon WorkSpaces licenses are not included in a TCA subscription.

## Thin Client Access

Enable connectivity to Teradici CAS or Amazon WorkSpaces
